Phone: 306 966-2761

Attention: Igor Morozov,

As per your notice of intent to conduct geophysical operations SaskTel does not have buried telephone facilities in the area of your proposed seismic survey. Enclosed is a part plan copy of our SaskTel grid map showing no buried cable facilities.

CONDITIONS/REQUIREMENTS:

- 1) Geophysical /seismic testing is not allowed on SaskTel easements.
- 2) Any seismic testing using shot holes, vibrators or surface explosions must maintain a minimum distance of:
 - a) 180m from telecommunications/microwave towers.
 - b) 180m from telecommunications/microwave tower guy wires/anchors.
 - c) 50m from SaskTel easements containing buried fiber optic cables.
 - d) 10m from SaskTel easements containing buried copper cables.
- 3) A company that intends to blast must call the Sask. 1st Call number (1866-828-4888) forty-eight (48) hours prior to blasting to have a SaskTel employee locate facilities and be available should any repairs be necessary. SaskTel advises that the Sask. 1st Call number be contacted prior to any seismic survey operations being performed in order to minimize risk of damage to SaskTel facilities.

If you require further information, please contact me at (306) 953-6627

OR email at sasktelfacility.crossings@sasktel.com

OR Construction Manager Sheldon Riehl. You can reach him at (306) 931-5441, or cell (306) 227-0852.

Sincerely,

Bev Gollan
